A District International Service Chair (DISC)

Rotary

Who Do DISCs Work With?

Rotary

Process Example

NOTE: The Project Team consists of both host and international partners

Club/District puts forth a project idea to DRFCC

DRFCC & DISC begin consulting with the Project Team to identify a host partner and engage resources

Host Partner conducts the Community Needs Assessment, followed by the Project Team seeking detailed input from experts, identifying the required resources and preparing a funding model

Project Team develops the plan for a sustainable outcome, gains commitments pending grant approval and generates the grant proposal

Following grant approval, the Project Team implements the project, while assessing, analyzing and managing its progress to completion (including the final report)
